

## ATE Learning Resources

25g oil (10p)

1 large onion, chopped (12p)

2 large fresh tomatoes (2 @ 39p each)

400g black-eyed beans (55p)

175g green peppers, chopped (2 @ 45p each)

300ml vegetable stock or water (5p)

100g gari - made from grated cassava (2 @38p each)

Gari and Beans

This recipe serves two people

1000g = 1kg

1000ml = 1l

1. You are so good at making gari and beans that you invite two friends for dinner. Change the amounts in the recipe to show how much you will need for four people.
2. You have a party and everyone asks you to cook your delicious gari and beans. If you invite 20 people to the party, what quantity of each ingredient will you need? Do you need to convert grams to kilogrammes/millilitres to litres?
3. How much does it cost to make gari and beans for:
  - 2 people?
  - 4 people?
  - 20 people?
4. You pay for the ingredients for 2 people with a £5.00 note. How much change will you get?
5. You pay for the ingredients for 4 people with a £10.00 note. How much change will you get?
6. You pay for the ingredients for 20 people with a £50 note. How much change will you get?

**Answers:**

	<b>2 people</b>	<b>4 people</b>	<b>20 people</b>
